Since EMBArk already has a wiki, we decided to extend the usage documentation and add the sections we implemented to this wiki:
https://github.com/e-m-b-a/embark/wiki/User-Documentation
(the Markdown is available in the Documentation directory)

Workers Dashboard

The "Add Configuration" button, allows you to add new worker nodes where you have to enter the following fields:

- Configuration Name
- SSH Username
- SSH Password
- IP Range in CIDR notation (e.g. 10.9.8.7/24)

The following information about the worker nodes is displayed on the right side:

- IP Address
- Status of the worker node
- OS Version
- CPU usage
- Memory usage
- Disk usage
- EMBA Version
- Last Sync with the worker node
- Status
- Config IDs

My Account

Offers basic profile settings.

The **User Menu** provides you with these options:

- Access the **Admin-page**
- Set a new time zone
- Generate a new API-key

Change password allows you to set a new password. Recommended after a new install.

Delete account Permanently deletes your account.
